Thank you for the information, Katrina. Hey, I have a quick question. Would it be possible to get copies of the historic aerial photos of the site? There are some from 1941, 1955, 1956, 1969, 1972, 1979 that were used in the Bristow Open House on 05/19/15. I'm looking for the entire photo, I am interested in a parcel north of I-44 approximately 1/4 – 1/2 mile north of the project site. Any help you can give me is greatly appreciated!

Subject: Draft Source Control Proposed Plan Wilcox Oil Company Superfund Site

James, Judith and LeeAnne, please find attached the electronic draft of the Source Control Proposed Plan. A formal letter requesting consultation and review will arrive in the mail. The purpose of this document is to propose cleanup action for the source areas we have identified as the remedial investigation continues. This document is specific to these source areas and will provide us with a pathway to address these areas earlier in the process and prior to completing the full site characterization and risk assessments. All remaining aspects of the site (e.g., remedial investigation, feasibility study, risk assessments, etc) will continue concurrent with this proposed plan. Final site-wide documentation will be provided in the remedial investigation report, the human health and ecological risk assessments, the feasibility study, and finally the site-wide decision document.

The documents attached are listed and described below. Once comments are received and incorporated, the document will be formatted to include the figures and text boxes in the appropriate locations and the document will be release to the public for review and comment. Thank you for your time and review. Please call with any questions.
